ASSET MANAGEMENT POLICY		
CONTROLLER: HSEQ PRINCIPAL ADVISOR	OWNER: EGIS-100% ENTITIES IN AUSTRALIA	

EGIS' Objectives drive EGIS **to be the preferred provider** of operational, maintenance and asset management services **to meet the requirements of the infrastructure owners** utilising internal capabilities and proven deliverables **to become a reliable partner of choice**.

These enable EGIS to be dedicated to contribute significantly to all stakeholders success by:

- Being committed in developing, maintaining and providing adequate resources for a certified asset management system based on the international standard AS / ISO 55001;
- Maintaining the Asset Management Policy annually reviewed and updated if required.
- Identifying the stakeholders' needs and expectations and transforming them into specifications as a fundamental part of the Strategic Asset Management Plan, SAMP,
- Achieving an effective and efficient level for the asset management system, by implementing and continually reviewing the SAMP and the Asset Management Plan, AMP in order to provide the best possible operation & maintenance product in Australia;
- Supporting an effective implementation of the SAMP methodology, EGIS shall: solve internal and external issues in a timely manner, implement corrective and preventive actions, using root cause analysis when applicable, consult and facilitate the participation of relevant stakeholders, perform audits and be audited, develop lean processes which shall be easy to use and effective, and consider innovation and reengineering as possible solutions to improve performance and reduce costs;
- Integrating Asset Management to the EGIS Integrated Management System;
- Including into the Asset Management System critical aspects of risk management, costs, intrinsic quality, safety, environment, motivation to work, reporting and mainly delivering on time. It also interacts with accounting, purchasing and human resources;
- Critical decisions about assets are made based on facts and data and when the risk rate is high or extreme the Corrective and Preventive Actions Procedure is applied and it is based on the Eight Disciplines principles.

Implementation and continual improvement of asset management processes as an important part of the EGIS Integrated Management System will support EGIS to provide an excellent value for money for all stakeholders and EGIS will achieve customer's preference, repeated business and sustainability.

The effective implementation of this Asset Management Policy will be facilitated through asset management KPIs cascaded through the organisation to create an environment of total involvement, risk management, commitment, work ethics and continual improvement.
